

Newsletter DWIH New York

November 2022

Dear reader,

After some busy weeks focused on planning the FUTURE FORUM, the DWIH New York team is taking time to reflect on this great event and will share more stories and testimonials soon. For now, have a look at the [fantastic photos on our website!](#)

We are already conceptualizing our events calendar for 2023 and it is looking promising. The DWIH annual topic 2023 will be "Resilience in Society" and we will be organizing various activities around this important topic.

With kind regards
The DWIH New York Team

Quantum Computers in Action

Quantum computers are one of the critical future technologies of the 21st century. They have the edge when it comes to solving complex computing tasks, but they require extremely high computing resources to do this. Researchers at Paderborn University have come up with an algorithm to solve this problem.
